You are cordially invited when in Europe to visit my nurseries. Take the tram at Rabot-Station in Ghent for Somergem-Drève, a trip of a short hour, seven trams daily each way.

RESPECTFULLY,

August HAERENS

My Novelties of 1908

I take pleasure to mention my friends and patrons and the trade in general that I have obtained from seed a very fine Stock of new Azaleas, twenty of them have been chosen for cultivation, of which *ten* have been adopted for general culture, as these have proven to be valuable varieties for the trade.

My experiences with them since four years cultivation and three years flowering have been such, to satisfy my highest expectations, and I declare that my novelties of 1908 will be standard varieties for years and years to come, as most of them surpass the old favorites.

I will try to give you a correct and true description of same, and I hope you will do the rest after you have convinced yourselves of their beauty and value.

10 N^{r} 1

MADAME AUGUST HAERENS

Cross of *Haerensiana* and *Simon Mardner* is a giant flower, beautifully formed, perfect double, three to four inches in diam : o fa charming light crimson color, a very free blooming variety of the most vigourous growth, the folliage is much of the *Haerensiana* tipe but rounder and lightly brownish varnished, each branch is strong enouph to bear a bouquet of its enormous flowers straight up and to keep it for weeks in fresh and pleasing condition, I consider this novelty as a superbe present to the horticulture in general, worth its weight in gold to horticulturists.

N^{r} 7-1 (WILL BE NAMED LATER)

Is a descendent of *Firefly* and one of our seedlings from *Camille Vervaene*, the flower is of M^{me} *Vander Cruyssen* size; of the firefly tipe, that is, with two rowns petals very nicely undulated, a little semi double in the center, it is of the beautiful crimson like the mother, very free, giving three, and often four perfect flowers per bud, it blooms for the 1st of March with very little forcing, thus it makes an ideal Easter

Azalea ; the elegant growth, the nice dark green folliage and its unequalled keeping qualities, make it of much greater value for grefting than firefly, because it has the graceful growth and habit of Camille Vervaene, wile firefly is too stiff when grefted, it will be such a valuable novelty as the foregoing, making a pleasing contrast with same in shape and in color.

11-1

VENUS (the most brilliant)

Seedling from *flambeau* and *Gross Postmaster General Stephan,* double and semi double flowers, of the finest and brightest red, shining above all Azaleas Known to day, it is an Easter variety, the flowers keep fresh for weeks on the plant and finely dry up on the plant from where they have to be removed, no drooping of faded flowers. The folliage is a nice brownish green, the growth and habit are graceful and pleasing, these variety will be a brilliant star among the Azaleas.

25-2

MISS SUZANNE HAERENS

Is an offspring of *Firefly* and Ch^es^ *Encke*, its charming little flowers are about of the size and tipe of firefly, of the most pleasing soft shining pink, a little brighter as *M^me^ Petrick*, most similar to the gloire de Loraine begonia in color a little deeper pink yet.

Every branch is crowded with buds, and every plant presents a mass of flowers like the Loraine begonia, for miniature Azaleas, for dwarfs, for flower baskets, so well as for grefting purposes, it will prove to be an ideal novelty, it will bloom with little forcing for Christmas, and probably for thanksgeving day, it is the best keeper in existence last year a plant was held for 8 weeks in a fine selling condition, that sets the crown on its qualities.

18-3

Souvenir WILLIAM W. EDGAR

Has for seed parents Madame Vander Cruyssen and Ernest Eeckhautte (a recent novelty of the best) the flower is a very fine double ; bright rose, nicely fringed, with a large crimson blotch an early bloomer for Christmas, Keeping for weeks in fresh condition. It has a large strong leaf, the growth is so strong as that of M^me^ Vander Cruyssen the robust and elegant branches, suport easily the weight of the many flowers, the habit is very good, taken in all it is a variety of great merit for the trade, it will be liked, it will be grown and it will be easily sold, it is a novelty to stay.

18-3

President ALEXIS CALLIER

Has the blood of Rector Kikxs mixed with that of Vander Cruyssen and Simon Mardner the flower an enormous star former one, semi double with exceptionnaly large

and vigourous petals, is a remarquable variety which strikis the eie at a glance, the color is a deep red shaded with brilliant purple over the entire mamouth flower of nearly four inches diam : the center is like an inexhaustable fontain of Red, no commercial florist should miss it, no amateurs collection is compleet without it.

6-9

STAR OF SOMERGEM

A very beautiful double deep red ligthly shaded with shining purple the flowering time with little forcing is about the 1st of March, of good keeping qualities of a vigourous growth with a beautiful green shining brownish leaf, it is a pleasing variety, which will take a good place among the Easter sorts it will proove himself a valuable market Azalea.

11-15

CHRISTMAS STAR

Is the sister plant of Venus, discribed here above, it is also nicely double of nearly the same color as Venus, that is, a most striking brilliant red, but it has one advantage on its sister, that it will flower for Christmas it being the first Azalea of that color which will bloom for this great Holiday.

NOTICE

More new varietis in Red, pink and white will be discribed in next years catalogue, or in a special list, after this year's flowering.

A collection of the above discribed Novelties will be shipped to my Agents next fall, they will be flowered there and shown the following spring, in the principal horticultural centers of the States.

Customers which should like to try the novelties themselves, can obtain for next fall one plant of each, ask the price to my Agents after May 15th 1908.

A. H.

Latest Novelty in Azalea culture

OF MY INTRODUCTION

I give my patrons the opportunity to procure for their fancy trade the newest article in Azaleas.

The FAN SHAPE AZALEA

grown in my nurseries only and exclusivily for my customers. A fine collection of a few hundred FANS in the best sorts is at hand, my choise of varieties I quote as follows :

1st	size good	Fan	Shape	. . . . .	$ 1,00 each
2nd	»	»	»	. . . . .	» 1,50 »
3rd	»	»	»	. . . . .	» 2,00 »
4th	»	»	»	. . . . .	» 2,50 »
5th	»	»	»	. . . . .	» 3,00 »
6th	»	»	»	. . . . .	» 4,00 »

P. S. Only a few are disponible of the two largest sizes.

NOTICE

I have in cultivation a few thousand Seedling Azaleas, of which the best novelties have been picked for cultivation, all the others ordinary sorts, of good red, rose and white, are grown into nice DWARF plants, these, I offer as a bargain, plants wel budded 10 to 15 inches diam : at $ 15,00 per 100.

Indian Azaleas

Are grown by me on a very extensive scale in a prime quality stock. My plants are of a good round shape, compact and bushy. The best varieties only are grown by me in quantities and as a rule I give purchargers the choice of the leading sorts, a large stock in M^me^ Vander Cruyssen, from $ 1,00 to $ 4,00 is on hand, D. Perle and Vervaeneana are also well represented at these prices.

I quote the sizes approximatively as the size will vary with different sorts even if of same age. I always endeavour to give full value, and therefore would ask to order by letter or money quotation in preference to order by inches.

Nice well budded Plants

Approximate describtion

Should one or other size or variety asked for in the order be exhausted or be lacking in quality, the size or variety nearest approaching will be suplied as far as the stock goes and at adequate prices, unless plain orders are given to the contrary.

New Variety

I also cultivate the new Azalea J. M. Keller originated with Haerens Bros and introduced in 1905, this is a cross between M^me^ Vander Cruyssen and Simon Mardner, a very fine double pink robust grower flowering readely for Easter a good keeper it is quite an acquisition, I will add this beautiful variety to an assorted order at the above quoted prices it can be furnished in the sizes D to P.

List of leading varieties

Light pink and variegated shades

1 **Haerensiana** is a splendid double pink with white margin, nicely undulated, very large flower dark green follage, the best keeper in existence an Easter variety, few specimen on hand.

*2 **Vervaeneana,** fine double pink with withe, early and for Easter.
